

# QUESTION MARK

A question mark is used in the English language when the writer wants to express uncertainty or doubt or wants to inquire about something by posing an inquiry over the matter. The question mark comes at the end of an interrogative sentence, i.e. a sentence that asks something or raises a qualm over a particular matter. It can also be used at the end of rhetorical questions (such questions that don't ask a question but hint towards making a sarcastic comment through what is asked in the question).
