

REGULAR VERB

Definition of regular verb: A regular verb is a type of verb in English Grammar whose past tense can simply be formed by adding -ed or -d to the root verb. For example, 'walk, walked, walked', 'save, saved, saved', 'reply, replied, replied', etc. Hence, regular verbs follow a common and predictable pattern in their verb forms as all of their past and past participle forms end with -ed, -d, or -ied, depending on the root verb.
